

## **DEVICE OPERATING WITH CODE LOCK SYSTEM USING 8051 MICROCONTROLLER**

### **Description:**

An **Device operating with code lock system** is a device which has an electronic control assembly attached to it. They are provided with an access control system. This system allows the user to unlock the device with a password. The password is entered by making use of a keypad. The user can also set his password to ensure better protection. The major components include a keypad, LCD and the controller AT89C51 which belongs to the 8051 series of microcontrollers. This article describes the making of an electronic code lock using the 8051 microcontroller.

**Block diagram:**

**Hardware requirements:**

1. Micro Controller
2. Motor
3. Keypad
4. Lcd Display

**Software requirements:**

1. Keil software
2. Embedded c
